WHERE IT ALL BEGAN
MESO OUR STORY

Every story has a beginning, and ours traces its roots back hundreds of years to the very birthplace of perfume. Our journey was shaped by history, refined by passion, and driven by an enduring pursuit of excellence.

THE STORY OF MESO

A JOURNEY THROUGH TIME AND SCENT

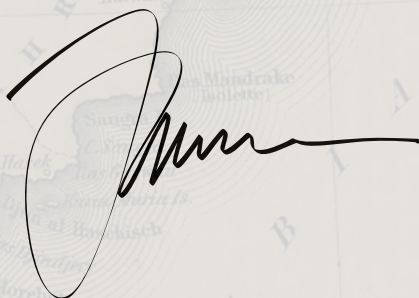

In times past, in the heart of an ancient land where the rivers met the earth, there was a city unlike any other—Mesopotamia. It was a place where the world's first wonders were born, where creativity and innovation thrived, and where people discovered the magic of scent.

In those days, the people believed that every fragrance carried the whispers of memories. They believed that scents could connect them to moments long passed and lead to dreams yet to come. And from this belief, the first perfumes were born—crafted from nature's purest elements, they carried a piece of the ancient world within them.

Meso, our brand, is a tribute to that great history. But we're not just looking back. We're taking that ancient magic and weaving it into something for today—a scent that's not bound by time, but transcends it. Meso is for everyone, whether you're experiencing your first perfume or have lived a lifetime filled with memories tied to fragrance.

Our perfumes are not just about how something smells. They are about how a scent can take you to a place, a moment, a memory, or even a dream. It's a bridge between the past, present, and future—just like the ancient city of Mesopotamia itself.

Meso invites you to step into a world where scent is an experience, not just a fragrance. It's a reminder that the world is full of stories, and every moment, every memory, is worthy of being captured in a scent that speaks to who you are and where you've come from.

IT'S ALL IN THE MIX

ALL OF THE PERFUME NOTES BY TYPE

Perfume notes are the scent layers that make up a fragrance, categorized into three types:

- **Top Notes** – The first impression, light and fresh, lasting a few minutes to an hour (e.g., citrus, herbs, light fruits).
- **Heart Notes** – The fragrance's core, emerging after the top notes fade, lasting several hours (e.g., floral, spicy, or fruity scents).
- **Base Notes** – The foundation, providing depth and lasting the longest (e.g., vanilla, musk, amber, sandalwood).

These notes blend and evolve over time, creating a unique scent experience on the skin.
